**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-5, 7, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Catinella et al (3807682).

Catinella teaches the claimed apparatus having an extraction device (30) to remove cast part (17), including a moveable mold section (12), a stationary mold section (11), the extraction member moveable between a first and second position (Fig. 1 and 2), the extraction member is disposed in a cavity (16) provided in the stationary mold section. The extraction member includes a lever (25), a lock (36), a plate (42), a pin (33a), and at least a first threaded fastener (26) to releasably secure the extraction member in the stationary mold.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1722

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 3, 6, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Catinella et al (3807682) in view of Diamond (6245277 B1).

Catinella teaches the claimed apparatus having an extraction device (30) to remove cast part (17), including a moveable mold section (12), a stationary mold section (11), the extraction member moveable between a first and second position (Fig. 1 and 2), the extraction member is disposed in a cavity (16) provided in the stationary mold section. The extraction member includes a lever (25), a lock (36), a plate (42), a pin (33a), and at least a first threaded fastener (26) to releasably secure the extraction member in the stationary mold.

Catinella fails to teach plurality of extraction devices disposed in the stationary mold section and a shoulder for supporting the extraction member on a ledge of the stationary mold section.

In regards to claim 8, the plurality of extraction devices serves to multiply the effect of the extraction device in removing the article from the cavity. It would have been obvious to one of ordinary skill in the art to modify Catinella with a plurality of

extraction devices in the stationary mold section to allow for multiple articles to be extracted at once.

Diamond teaches the extraction device (118) that has a shoulder (120) that meets the ledge (149) of the stationary mold section (164).

It would have been obvious to one of ordinary skill in the art to modify Catinella with a shoulder and ledge as taught by because it would prevent flash from occurring where the extraction member meets the cavity.

**Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hersbt.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emmanuel S. Luk whose telephone number is (703) 305-1558. The examiner can normally be reached on Monday through Friday 8 to 4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on (703) 308-0457. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
